Visit our website: If you are interested in developing Web applications using Wakanda Studio, please check out our API access service for Android, Apple and Java Web Start clients and the Wakanda Studio Mobile SDK. I find the idea of programming in a text editor a bit tedious. I would much prefer to use a visual editor that I can move things around, reorder, view in layers, etc. IntelliJ is an IDE that does this well. Today I will share a plugin for IntelliJ to enable the use of JavaScript for the application and create a simple Google map for the app. The plugin will be located under "Install plugins" from the menu bar in IntelliJ, and the Google Map plugin is located here: I hope this

Additional Notes: This is the mod that brought back the Toxic Pools and it's the mod I use in most of my Pokémon X playthroughs. This also has a TINY probability of the side effects. This mod was created by the awesome Sand0verSea, and he deserves all the credit and thanks. If you would like to have a PM with Sand0verSea, feel free to send him a PM. For a video showing a playthrough where this mod was used, go here: www.youtube.com/
